

DEMAX SERIES

De-watering Submersible Pumps

The Davies DEMAX Series pumps are a rugged contractors pump suitable for de-watering tasks such as emptying sumps, footings and flooded areas. The DEMAX has a vortex impeller with extended shaft agitator to reduce intake blockages and a rugged flexible PVC moulded foot to protect pump base. Available with or without a float switch and with a rugged top handle for ease of use.

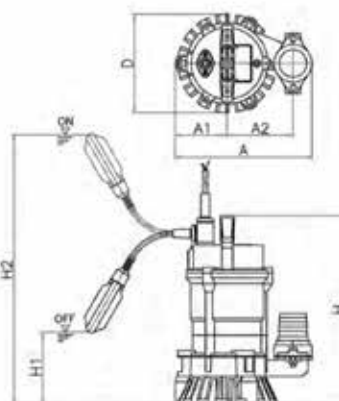

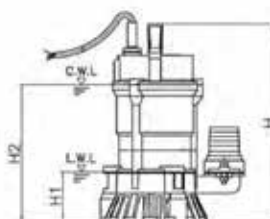

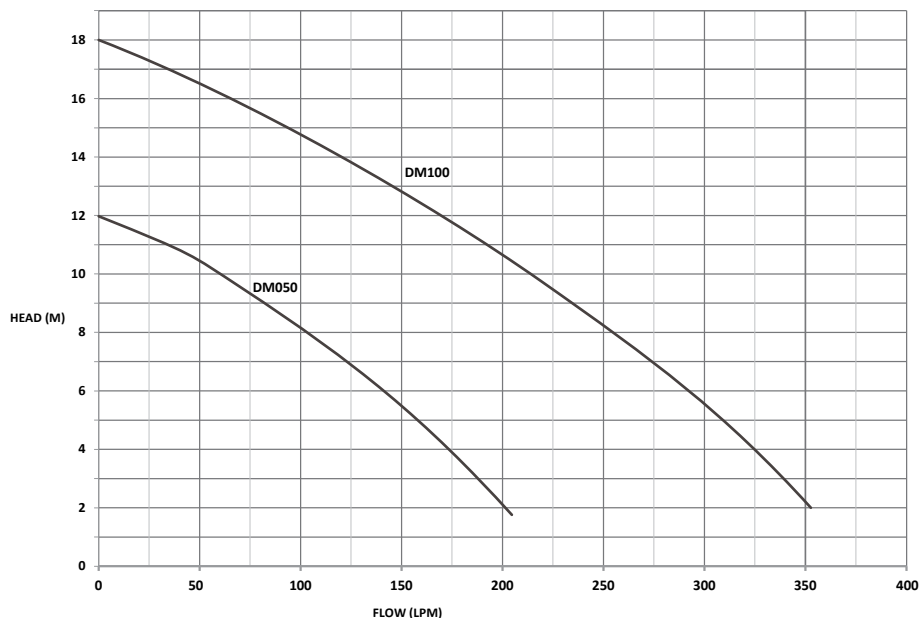

Features

- Non Clogging Vortex Impeller design
- 3 Thermal Protector (single phase)
- Double Mechanical Seal
- Double shielded Ball Bearing
- Liquid Temperature 0° to 40° C
- Pump Casing Cast Iron GJL 200
